

CAMP ZEBRA

Fact Sheet

Introduction

'Camp Zebra' is named after the Zebra which follow the Wildebeest during their world famous annual migration. Like the animal it is named after, the camp follows the migration between the Northern, Central and Southern parts of the Serengeti National Park, according to where the Wildebeest are to be found. Camp Zebra is closed from the beginning of April till the end of June during which period you can still book a private and exclusive 'Intimate Camp' anywhere you desire.

Locations

1st June till 15th July – Central Serengeti

16th July till 31st October – Northern Serengeti

1st November till 15th December – Central Serengeti

16th December till 31st March – Ndutu area

Please note that these dates may vary slightly according to the precise location of the Wildebeest herds.

Accommodation

'Camp Zebra' consists of 6 accommodation tents, each of which can be used for single, double (or twin) or triple occupancy. Each sleeping tent consists of a verandah, bedroom area, dressing area and ensuite shower and flush toilet. As an

added convenience, each tent is supplied with electricity for lighting as well as for charging mobile telephones, cameras, tablets, laptop computers or any other electronic devices you may carry with you. This electricity is harvested from the sun's rays via a solar system.

Family Accommodation Tents

Camp Zebra also has a family tent which comprises a verandah, lounge, two bedrooms (each of which can be set up as singles, doubles or triples), two dressing areas and two separate ensuite bathrooms.

Lounge & Dining Tents

The camp is well laid out to include both a lounge tent as well as a dining tent.

The lounge tent is furnished with comfortable settees and armchairs and is complete with a selection of Coffee table books, board games, a writing bureau and wireless internet connectivity so as to ensure that your every need is catered for when you are not out enjoying game drives.

The dining tent allows for individual as well as group dining and is home to a well-stocked bar which serves a selection of premium spirits, wines, beers and minerals, the cost of which is included in your accommodation rates. Guests may also enjoy their meals al-fresco in the camp's grounds.

Evenings are spent around the all-important camp fire enjoying drinks and bitings whilst exchanging stories about the day's events and making plans for the day ahead.

Activities

The main emphasis of the activities available at Camp Zebra is the viewing of the extraordinary Wildebeest migration which is one of the "Seven Natural Wonders of Africa" as well as the single largest mass movement of animals on the planet. That said, there are many other forms of wildlife and birdlife which can be viewed during the course of game drives and these are further enhanced by some of the most spectacular nature to be seen anywhere on the African continent.

Guests are also able to participate in Balloon Safaris although arrangements for this need to be made prior to your arrival in Tanzania.

'Fly-in' and 'Drive-in' Safaris

Camp Zebra can also be booked as a 'flying Safari' destination with both airstrip transfers and game drives being carried out in our own 4 x 4 vehicles driven by our own highly trained professional guides.

Camp Zebra and the environment

With over a decade of experience operating camps in the different national parks making up the Northern Safari circuit, Intimate places has developed very strict policies and procedures with regards to the protection of the fragile environments in which we operate. These are also to be found at Camp Zebra.

- All the camps power requirements is generated through a state of the art solar power system. A standby generator is on hand for use only when required.
- Intimate Places is proud to support the “throttle the bottle” initiative whereby plastic bottles are banned from all of our properties.
- The garbage produced by the camp is burned in especially designed and constructed incinerators with plastics, tins and glass, etc. all being transported back to Arusha for proper disposal at municipal facilities.
- Once the camp is uprooted from a site, we leave little or no evidence of the fact that it was ever there.

You can find out more about Intimate Place’s commitment towards preserving the environment by clicking [here](#).

Special Notes

1. Since the movement of the migration is dictated primarily by rainfall which can be as unpredictable in Tanzania as in most other parts of the world, Camp Zebra has been designed to be mobile so that it can be moved as quickly as possible to keep up with the Wildebeest when they too move.
2. Camp Zebra underwent a major refurbishment in April and May 2018 which was overseen by Astrid Kleinvelt, an Arusha based interior designer.

At a Glance

Facilities & Services

- 220 V electricity (solar power).
- Hot & Cold running water.
